MULLA SHADRA

Quality Assurance Engineer

Jakarta, Indonesia | +62 813-1058-0321 | mshadra6@gmail.com | linkedin.com/in/mulla-shadra

Professional Profile

Quality Assurance Engineer with experience in banking systems, distribution management applications, and Android/iOS mobile products. Skilled in preparing test cases from Functional Specification Documents (FSDs), validating data with SQL Server, and supporting SIT/UAT. Built a keyword-driven Katalon Studio framework for web regression testing. Currently expanding knowledge of test automation and software engineering fundamentals.

Work Experience

Software Quality Assurance

PT Bosnet Distribution Indonesia | DMS — Apr 2026 - Sep 2026

- Prepared functional, negative, and regression test cases from FSDs for desktop DMS and mobile distribution applications.
- Tested order and sales workflows across desktop and mobile apps used by administrators, sales representatives, retailers, and wholesalers.
- Validated business rules and data integrity across integrated desktop and mobile workflows using SQL Server queries.
- Documented defects with reproduction steps, expected and actual results, and supporting evidence; verified fixes and regression impact.
- Maintained test case execution records and defect lists in Excel to support internal testing and UAT follow-up.
- Supported UAT with System Analysts and Developers through issue investigation, retesting, and test evidence preparation.

Software Quality Assurance Staff

PT Profescipta Wahanateknik | Banking and financial systems — Dec 2024 - Mar 2026

- Translated detailed banking FSDs, business rules, data mappings, and exception flows into test cases.
- Performed functional, negative, boundary, integration, and regression testing for eStatements, reporting, and data processing.
- Traced transactions from the UI through backend services to database records; checked generated outputs against source data.
- Used SQL Server to verify file processing, generated documents, email delivery records, and transaction outcomes.
- Prepared QA status reports and coordinated defect retesting with Developers and System Analysts.
- Tracked defects and supported internal testing, SIT, and UAT; built and shared a reusable keyword-driven Katalon Studio framework.

Software Quality Assurance Intern

PT Phincon (Phintraco Consulting) | MyTelkomsel — Feb 2023 - Feb 2024

- Created and executed test cases for Android and iOS features; reported defects and verified fixes.
- Compared UI implementation with Figma designs and supported SIT and internal regression testing.
- Collaborated with the Product Owner, Developers, Project Manager, and Scrum Master to clarify expected behavior.

Education

BINUS University 2020 - 2024

Bachelor of Science in Information Systems (Business Information Technology Program) | GPA 3.71 / 4.00

Selected Projects

BRO Retail and Wholesaler order flow | Bosnet

Tested order submission, wholesaler confirmation, receipt photo upload, and administrator confirmation across the retail app, wholesaler app, and DMS. Verified status transitions and related transaction data.

MODIS canvassing | Bosnet

Tested field sales workflows and input validation, reviewed FSD handover items, and verified UAT fixes with System Analysts.

Banking statements and processing | Profescipta

Tested statement and reporting flows, raw file processing, generated PDFs, and email tracking. Checked service outcomes and database records against mapping rules.

Katalon regression framework | Profescipta

Created reusable keywords and test objects for web regression scenarios, organized test suites, and shared the framework with QA colleagues.

MyTelkomsel mobile application | Phincon

Tested customer-facing Android and iOS features, including functional behavior, regression scenarios, and UI consistency with Figma designs.

Skills

- Testing: Functional, negative, boundary, integration, and regression testing; test case design, defect reporting, SIT, and UAT.
- Tools: SQL Server (SSMS), Katalon Studio, Postman, Fiddler, Azure DevOps, Figma, and Microsoft Excel.
- Systems: FSD analysis, business rule validation, data mapping, UI-to-service-to-database flows, and SDLC/STLC.
